Personally, I've had the opportunity to give away [nail enamel](#), lovely beaded [jewelry](#), and natural [skin care](#). This time, I've got something really unique - [Beauty Scoop - The Edible Beauty Accessory](#).

Beauty Scoop was developed by plastic surgeon, Dr. Michelle Yagoda and Dr. Eugene Gans, Ph.D, chemist and inventor. **Beauty Scoop is all natural, vegetable based, and uses peptides and lipids to beautify skin, hair, and nails.** Beauty scoop goes beyond the healing effects of normal supplements to boost the body's natural healing process. **Clinical trials showed that 86% of the people who used Beauty Scoop reported an improvement in skin, hair, and nail within 3 weeks.**

BeautyScoop comes in convenient pouches and can be added to any beverage. You can read more about the product and watch a short [video here](#). **BeautyScoop is truly beauty from the inside out.**

If you'd like to try BeautyScoop for yourself, please **leave a comment on this post** sharing one of your own personal beauty secrets. I'll pick a random winner from the comments and announce it tomorrow.

Don't forget to see what else is in store for March Madness by [clicking here](#).
